SUMMARY

Software Engineer with cross-platform production experience in backend microservices, native mobile apps (iOS + Android), and embedded IoT systems. Built real-time data pipelines with Apache Kafka, deployed containerized services, and led a 3-person team that advanced to TEKNOFEST 2025 finals. Published researcher (2x ICSIS 2025) with strong testing practices (pytest, JUnit, XCTest) and CI and CD expertise.

EXPERIENCE

Atasayar Teknoloji - Codlean | AI Engine Developer Co-op Duzce, Turkey | Feb 2026 - Jun 2026

- Built real-time SCADA data pipelines with **Apache Kafka + FastAPI**, reducing processing latency by **40%**
- Deployed **Llama 3.1 (8B)** on-premise; architected Multi-Agent decision system with 5 specialized AI agents
- Developed secure API Gateway microservice (FastAPI): token auth, Gemini and Groq fallback, OpenAPI docs; 21-test pytest suite
- Trained **XGBoost** predictive model (**AUC 98.5%**); added SHAP and DLIME explainability, reducing unplanned downtime by **25%**

Kriptarium | Software and AI Engineer Internship Elazig, Turkey | Aug 2025 - Oct 2025

- Benchmarked 20+ CNN and ViT architectures on DIBaS 33-class dataset using **PyTorch** and **TensorFlow and Keras**, achieving **95.45% accuracy**
- Optimized models for edge deployment via **ONNX Runtime, CoreML, TorchScript** - reduced inference time by **60%**
- Built companion Android app in **Kotlin and Jetpack Compose**; set up quality pipelines with JUnit, Espresso, Gradle CI

PROJECTS

Sa-Ra - Wireless Emergency Communication and Signal Processing Jan 2024 - Dec 2025

TEKNOFEST 2025 Finalist | TUBITAK 2209 Funded | Team Lead (3 people)

- Architected BLE and LoRa mesh network on **ESP32 (C, C++)** with CNN-based anti-jamming and adaptive modulation
- Built iOS companion app in **Swift and SwiftUI**; configured **GitHub Actions CI and CD** + SwiftLint

Pharmora - B2B Pharmaceutical Exchange Platform Jan 2024 - Dec 2025

Solo Developer | Deployed on Railway

- Full-stack: **React + Node.js and Express + MongoDB** with Docker; integrated OpenFDA API
- Native mobile client in **Swift and SwiftUI** with XCTest coverage

GreenGuard - Smart Plant Care Analytics Platform Jan 2025 - Jun 2026

Solo Developer

- Desktop analytics with **C#.NET + SQL Server** for sensor anomaly detection; integrated **Groq API** for NLP-powered diagnosis

Metrika - Real-Time KPI Dashboard Jan 2024 - Dec 2025

Frontend Lead (3-person team) | Deployed on Vercel

- Built with **React 19, TypeScript, Vite, Tailwind CSS**; enforced code quality via ESLint + Prettier

Ergin Soy Insaat - Corporate Website Jan 2024 - Jun 2024

- Designed and deployed responsive corporate website (erginsoyinsaat.com) as freelance project

AWARDS AND ACHIEVEMENTS

- TEKNOFEST 2025 Finalist** - Wireless Communication and Signal Processing category (national competition)
- TUBITAK BiGG CUBE Shortlisted** - AI-driven entrepreneurship and commercialization program
- TUBITAK 2209-A Research Grant** - Funded undergraduate research project (Sa-Ra)

PUBLICATIONS

- "Lightweight CNN Models Outperform Vision Transformers on a Small-Scale Medical Imaging Dataset" - **ICSIS 2025**
- "An AI Model for Predicting and Generating LGS Exam Questions" - **ICSIS 2025**
- LGS Turkish Question Dataset v1.0 - Zenodo (DOI 10.5281)

EDUCATION

Firat University - B.Sc. Software Engineering | GPA: 3.00 out of 4.00 Sep 2022 - Jul 2026

Anadolu University - B.A. Business Administration (Distance) | In Progress Sep 2024 - Aug 2026

TECHNICAL SKILLS

Languages:	Python, TypeScript, Swift, Kotlin, C, C++, C# (.NET)
Backend and Cloud:	FastAPI, Node.js, Express, Apache Kafka, Docker, AWS EC2, PostgreSQL, MongoDB, REST API, Microservices
Mobile and Web:	SwiftUI, Jetpack Compose, React 19, Tailwind CSS, Vite, HTML, CSS
AI and ML:	PyTorch, TensorFlow, Keras, XGBoost, Scikit-learn, ONNX, Hugging Face, SHAP, CoreML, Multi-Agent Systems
Data and Analysis:	Pandas, NumPy, SQL, Feature Engineering, Data Pipelines
DevOps and Test:	Git, GitHub Actions, CI and CD, pytest, JUnit, XCTest, Espresso, ESLint
Embedded:	ESP32, BLE Mesh, LoRa, SCADA
Methods:	Agile, Scrum, Jira, OOP, TDD, Microservices

CERTIFICATIONS AND LANGUAGES

- Deep Learning Specialization - Coursera (Andrew Ng) | Google AI and ML Crash Course - Google
- Languages:** Turkish (Native) | English (Upper-Intermediate)
