

Rümeysa Ahsen Çiçek

AI / ML Engineer · Industrial AI & Computer Vision

Istanbul, Türkiye · ahsen.cicek752@gmail.com · +90 551 152 39 12 · Portfolio · GitHub · LinkedIn

PROFILE

Software Engineering graduate focused on industrial AI and computer vision. Delivered a working predictive-maintenance engine with live customer data, an on-premise LLM and specialized agents; benchmarked 20+ medical-imaging models and contributed to two conference papers.

EXPERIENCE

Atasayar Teknoloji (Codlean) — AI Engine Developer | Feb–Jun 2026 · Düzce, Türkiye

- Built Kafka and FastAPI pipelines for live customer machine data, validation and state management; delivered the working system to the team for subsequent SCADA screen integration.
- Developed an XGBoost fault prediction model (AUC 98.5%) with SHAP and DLIME explanations.
- Deployed Llama 3.1 8B on-premise and built a five-agent decision workflow, APIs and an operator-facing dashboard used together with real customer data.

Kriptarium — Software & AI Engineer Intern | Aug–Oct 2025 · Elazığ, Türkiye

- Benchmarked 20+ CNN and ViT architectures on the 33-class DIBaS dataset; achieved 95.45% top-1 accuracy.
- Prepared ONNX Runtime, CoreML and TorchScript deployment paths and developed an Android companion app with Kotlin and Jetpack Compose.
- Joined the TÜBİTAK BiGG CUBE entrepreneurship program with teammates; our application was shortlisted.

SELECTED PROJECTS

Sa-Ra — Resilient emergency communication | 2024–2025

- Led a three-person team developing ESP32 BLE / LoRa mesh communication, Python signal simulations, adaptive modulation, anti-jamming strategies and an iOS companion app. TEKNOFEST 2025 finalist; TÜBİTAK 2209-A funded.

VisionVet-AI — Mobile veterinary imaging | 2025

- Worked on CNN-based microscopy image analysis and mobile inference with ONNX and CoreML in coordination with clinical partners.

GreenGuard — Smart plant analytics | 2025–2026

- Built a C# / .NET desktop decision-support workflow with sensor anomaly detection and NLP-based care recommendations.

RESEARCH AND RECOGNITION

- Two ICSIS 2025 conference papers: DIBaS CNN/ViT comparison (proceedings p. 54) and LGS question generation / dataset study (p. 778). Proceedings.
- LGS Turkish Question Dataset v1.0, Zenodo DOI 10.5281/zenodo.18304976.

EDUCATION

Firat University — B.Sc. Software Engineering, Jul 2026 · GPA 3.00/4.00

Anadolu University — Business Administration, distance study, 2024–2026

TECHNICAL SKILLS

ML: PyTorch, TensorFlow, Keras, XGBoost, scikit-learn, SHAP, DLIME, Llama 3.1, multi-agent systems · **Deployment:** ONNX Runtime, CoreML, TorchScript, FastAPI, Docker · **Data:** Python, Pandas, NumPy, SQL, Kafka · **Product:** React, SwiftUI, Kotlin, .NET · **Testing:** pytest, JUnit, XCTest
