

Rümeysa Ahsen Çiçek

Software Engineer · Industrial AI & Full-Stack

Istanbul, Türkiye · ahsen.cicek752@gmail.com · +90 551 152 39 12 · Portfolio · GitHub · LinkedIn

PROFILE

Software Engineering graduate building systems across live data, AI, APIs and user interfaces. Delivered an end-to-end industrial AI engine with real customer machine data; led a TEKNOFEST finalist team and built web, mobile and desktop products.

EXPERIENCE

Atasayar Teknoloji (Codlean) — AI Engine Developer | Feb–Jun 2026 · Düzce, Türkiye

- Built Kafka and FastAPI pipelines for live customer machine data, validation and state management; delivered the working system to the team for subsequent SCADA screen integration.
- Developed an XGBoost fault prediction model (AUC 98.5%) with SHAP and DLIME explanations.
- Deployed Llama 3.1 8B on-premise and built a five-agent decision workflow, APIs and an operator-facing dashboard used together with real customer data.
- Built a token-authenticated FastAPI gateway with OpenAPI documentation and a 21-test pytest suite.

Kriptarium — Software & AI Engineer Intern | Aug–Oct 2025 · Elazığ, Türkiye

- Benchmarked 20+ CNN and ViT architectures on the 33-class DIBaS dataset; achieved 95.45% top-1 accuracy.
- Prepared ONNX Runtime, CoreML and TorchScript deployment paths and developed an Android companion app with Kotlin and Jetpack Compose.
- Joined the TÜBİTAK BiGG CUBE entrepreneurship program with teammates; our application was shortlisted.

SELECTED PROJECTS

Sa-Ra — Resilient emergency communication | 2024–2025

- Led a three-person team developing ESP32 BLE / LoRa mesh communication, Python signal simulations, adaptive modulation, anti-jamming strategies and an iOS companion app. TEKNOFEST 2025 finalist; TÜBİTAK 2209-A funded.

Pharmora — B2B pharmaceutical exchange | 2024–2025

- Built a React dashboard, Node.js / Express API, MongoDB data layer and SwiftUI mobile client with barcode scanning and OpenFDA integration.

Metrika — Real-time KPI dashboard | 2024–2025

- Led the React / TypeScript frontend in a three-person team; deployed the interface on Vercel.

Ergin Soy İnşaat — Client website | 2024

- Designed and published a responsive corporate website for a construction company as a freelance project.

GreenGuard — Smart plant analytics | 2025–2026

- Built a C# / .NET desktop decision-support workflow with sensor anomaly detection and NLP-based care recommendations.

RESEARCH AND RECOGNITION

- Two ICSIS 2025 conference papers: DIBaS CNN/ViT comparison (proceedings p. 54) and LGS question generation / dataset study (p. 778). Proceedings.
- LGS Turkish Question Dataset v1.0, Zenodo DOI 10.5281/zenodo.18304976.

EDUCATION

Firat University — B.Sc. Software Engineering, Jul 2026 · GPA 3.00/4.00

Anadolu University — Business Administration, distance study, 2024–2026

TECHNICAL SKILLS

Languages: Python, TypeScript, Swift, Kotlin, C/C++, C# · **Backend:** FastAPI, Node.js, Express, Kafka, REST APIs, Docker, PostgreSQL, MongoDB · **Interfaces:** React, SwiftUI, Jetpack Compose, .NET · **AI:** XGBoost, PyTorch, SHAP, ONNX, CoreML · **Testing:** pytest, JUnit, XCTest, GitHub Actions
